Experience:

Full-Stack Web Developer (Werkstudent)

DAGOCAR Automotive Services GmbH
Bamberg, Germany
March 2019 – To date
My role as Full-Stack Web Developer in a project for the Client is to analyze the user requirement and business workflow in order to implement the appropriate web services and forms to serve the system in an optimized flow.

Technologies: ASP.Net MVC, MS SQL Server, Bootstrap for design and UI, Entity Framework, JavaScript, jQuery, Ajax, CSS and HTML.

Software Developer

Exceed IT Services
Dubai, United Arab Emirates
April 2017 – August 2018
My role as a .Net / Front-End Web Developer in a project for the Client is to analyze the user requirement and implement the appropriate web services and forms to serve the system in an optimized flow. The purpose of our smart system is to automate the client's service into a mobile form using responsive layout and web services.

Technologies: ASP.Net Web forms, Single Page Applications, WCF, MS SQL Server, Bootstrap for design and UI, Entity Framework, JavaScript, jQuery, Ajax, SCSS, CSS Media queries, CSS and HTML.

ASP .Net / Front-End Web Developer

Stroika Software
Dubai, United Arab Emirates
Jan 2015 – April 2017
My role as a .Net / Front-End Web Developer in a project for the Client is to analyze the user requirement and implement the appropriate web services and forms to serve the system in an optimized flow. The purpose of our smart system is to automate the client's service into a mobile form using responsive layout and web services.

Technologies: ASP.Net Web forms, Single Page Applications, WCF, MS SQL Server, Bootstrap for design and UI, Entity Framework, JavaScript, jQuery, Ajax, CSS Media queries, CSS and HTML.

ASP .Net Developer

Eskadenia Software
Amman, Jordan
Oct 2013 - Jan 2015
My main responsibilities were maintaining and expanding the existing development activities and developing software from documented requirements.

Technologies: ASP.Net Web forms, WCF, Oracle 10g, Crystal Reports, JavaScript and jQuery, Ajax, CSS and HTML.

Web Developer
SNSEO (Digital Agency)

Amman, Jordan

Apr 2012 - Oct 2013

My main Responsibilities are: Building web applications using several technologies as the business requirements needs, such as web forms and MVC (using C#). During my work there I have learned and developed applications for Windows 8 and Windows Phone 8. Also, I had a chance to publish my code to live servers and become familiar with IIS, FTP, hosting and domains.

Technologies: ASP.Net Web forms, ASP.Net MVC, WCF, SQL Server, Entity Framework, Windows Phone 8, Windows Store Apps, XAML, JavaScript and jQuery, Facebook API, YouTube API, Twitter API, Google Analytics, Ajax, CSS and HTML.

Software Quality Analyst
Aspire Services

Amman, Amman, Jordan

Feb 2012 - Apr 2012

My main Responsibilities were doing several types of testing, writing scenarios and logging defects to assure that the product meets the client's requirements.

Languages:

- **Arabic**: native speaker.
- **English**: excellent command / highly proficient in spoken and written.
